Visi-Trak® Announces New Portable Process Monitoring System for die-casting machines

Portable, powerful and priced affordably

Cleveland, Ohio, U.S.A. – May 6th – Visi-Trak Worldwide, LLC announces a new, portable version of their respected True-Trak20/20™ die-casting monitoring system. Priced at only \$5995 the True-Trak20/20 Portable brings process monitoring to any sized die-casting operation.

The True-Trak20/20 system lets you monitor, archive, and analyze shot data from multiple machines and give your customers the information they require. Quickly pinpoint machine problems to improve quality, reduce scrap, and determine machine efficiency. True-Trak20/20 works with virtually any vendor's machine and lets you monitor machines from multiple vendors for one integrated shot-monitoring picture.

True-Trak20/20 provides you with the tools to:

- Create quality castings by understanding the cause of variation.
- Reduce scrap & set-up time and avoid downtime.
- Document machine capability to minimize surprises.
- Diagnose machine problems quickly and with confidence.
- Perform statistical process control and continuous machine monitoring.

“The True-Trak20/20 portable lets any sized die-casting operation experience first-hand the cost-savings, quality improvement, and business intelligence potential of process monitoring. Our long-time customers are believers in the positive bottom-line effect that process monitoring brings and they understand the return on investment they receive. This new portable system brings that same power to die casters who considered process monitoring out-of-reach for their operations,” says Jack Vann, CEO of Visi-Trak.

Visi-Trak has pioneered process automation in the die-casting industry - increasing our customer's efficiency, product quality, and bottom line. Visi-Trak has dedicated over 30 years to developing rugged, precise, and cost-effective sensors, process monitors and control systems.

VISI-TRAK® ANNOUNCES NEW PORTABLE PROCESS MONITORING SYSTEM FOR DIE-CASTING MACHINES

Visi-Trak provides the tools required to reliably manufacture to the most challenging design specifications.

“The True-Trak20/20 portable is designed and priced to let those die-casters who have not yet embraced process monitoring to get into the arena. By implementing process monitoring customers will reduce scrap, avoid downtime and quickly diagnose machine problems. This means increased margins, better contracts, and the statistical insight to improve their entire organization. We clearly see the new TT20/20 Portable as a first step for many organizations towards total process monitoring and control,” says Derek Carbonneau, Director of Marketing for Visi-Trak.

The new True-Trak20/20 Portable comes in an industrially hardened case that can be secured to a rolling cart for easy mobility. The portable system connects with standard cat-5 cable for easy, inexpensive set-up. Just attach a customer-provided laptop to the system and install our True-Trak20/20 software for instant monitoring.

True-Trak20/20 Portable is available immediately from Visi-Trak® for \$5995. Call 800-252-8725 for more information.

COMPANY BACKGROUND

Visi-Trak® Worldwide, LLC (Cleveland, OH) and its predecessor companies have been developing industrial sensors and control software since 1972. Visi-Trak® Worldwide, LLC produces precision sensors, monitoring systems, and control software for rugged industrial applications. Visi-Trak’s products include a line of digital quadrature encoder and high-resolution linear position systems as well as the Fas-Trak2™, True-Trak20/20™, and Sure-Trak2™ data acquisition, monitoring, and control systems. Visi-Trak® industrial control software includes SoftSHOT™ for precision die-casting impact control and Total-Trak HMI integrated PLC interface. Visi-Trak also exclusively licenses High-Q-Cast - High Integrity Aluminum Die-casting in the Western Hemisphere. Visi-Trak® has offices in Charlottesville VA, and is headquartered in Cleveland OH. Visi-Trak® Worldwide, LLC is privately held. Visi-Trak®’s web site can be found at <http://www.Visi-Trak.com>.
