

Visi-Trak[®]
SENSE, MONITOR, CONTROL

Total-Trak[™]

PROGRAMMABLE LOGIC CONTROLLER FRONT-END

EXTEND MONITORING & CONTROL TO INCLUDE
YOUR ENTIRE DIE CASTING MACHINE CELL.

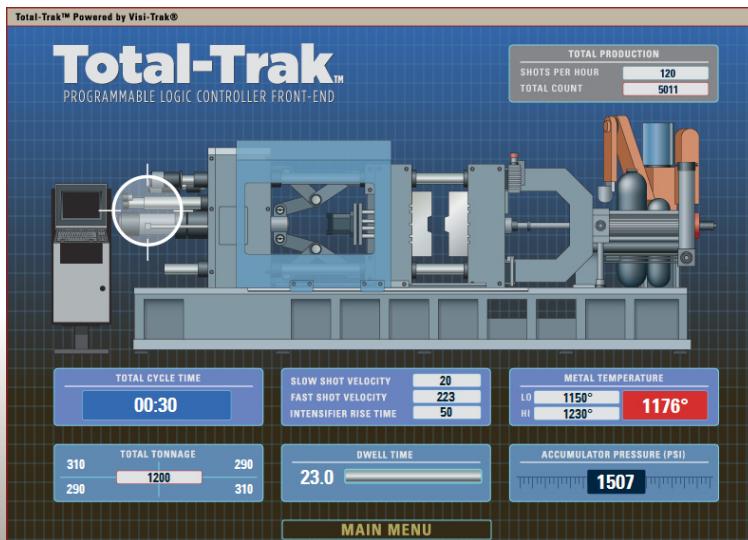

Create and save recipes, monitor clamp tonnage, set core sequences, and set timers. Use diagnostic screens to quickly identify problems, and capture PLC related process information for analysis.

PROCESS MONITORING

- **Monitor & control**, your entire automated machine cell.
- **Easy set-up** - restore saved jobs in seconds.
- **Complete I/O Diagnostics** for a comprehensive view.
- **Integrated control** with the True-Trak20/20[™] or Sure-Trak2[™].
- **Ladder logic display** options available.
- **Cost-effectively** replace your obsolete systems.

TOTAL-TRAK DIE CASTING MACHINE CELL CONTROL

FULLY INTEGRATED PLC INTERFACE FOR DIE-CASTING

- 1 **Complete control** for your entire machine cell
- 2 **At-a-glance monitoring** and complete I/O diagnostics
- 3 **Fast set-ups** with consistent results
- 4 **Ladder logic display** option available

CUSTOMER SPOTLIGHT

PORT CITY GROUP

GOALS

- **REPLACE PROMANAGER** system at a reasonable cost

INSTALLATION

- **REPLACED 2 PROMANAGER** systems with Total-Trak.
- **MORE REPLACEMENTS** planned for 2008

RESULTS

- **SINGLE PANEL CONTROL** for entire machine cell.
- **ACCELERATION CONTROL** added to existing cells.

PROGRAMMABLE LOGIC CONTROLLER INTERFACE

TOTAL-TRAK™

“We were relieved to find **an economical replacement for our old ProManager’s**. That it was a Visi-Trak product, with their support, made it even better. The machine now has acceleration control capability, which it did not have before, and the entire installation took just a couple of hours. **We’re planning to add it to all of our other machines, already equipped with Sure-Trak2 Controls”**
