

**Visi-Trak®**  
SENSE, MONITOR, CONTROL

## PART TRACEABILITY SYSTEM

TOTAL PART TRACKING FROM SHOT TO SHIP

IDENTIFY, TRACK, AND STORE QUALITY CONTROL  
DATA FOR EVERY PART YOU MAKE

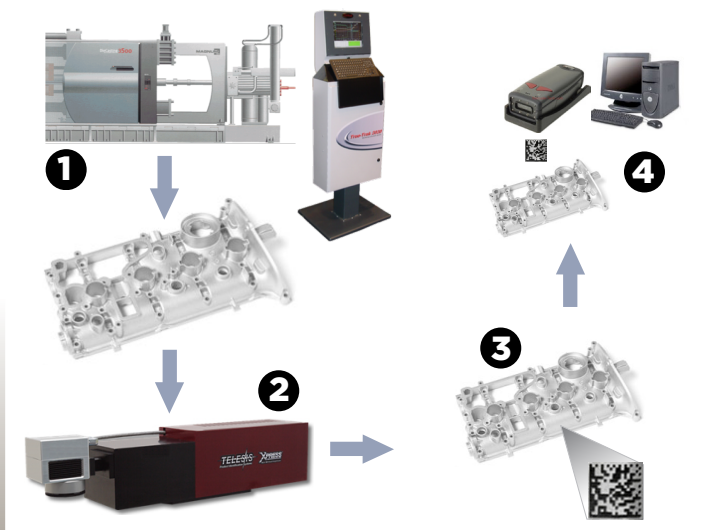

Completely automate the process of collecting QC shot data and adding unique part ID scripting. Even add secondary machining data entry to capture a complete QC picture for you and your customers.

### TRACEABILITY

- **Automatically collect and archive** valuable shot data for each part.
- **Uniquely identify each part** you produce.
- **Capture and link** important secondary machining data
- **Improve quality** by analyzing data and informing your customers.
- **Archive your valuable information** for future access.

## PART TRACEABILITY SYSTEM

FOR THE TRUE-TRAK 20/20

- 1 Fits into your existing system**  
add to any common DCM
- 2 Control Scribing machine**  
and link shot QC data
- 3 Uniquely Identify**  
every part
- 4 Track parts** even through  
secondary machining
